Unrivaled Information Security for SMB's

No longer just an ancillary function of IT, in today's business environment, information security is an essential and core component of a successful information technology strategy.

In an era where organizations fall victim to cyber attacks on a daily basis, businesses need an experienced ally that places the protection of their digital assets above all else.

Comprehensive Security Services

Successfully navigating today's continually evolving cybersecurity landscape requires a technology partner with a forward-thinking, security-centric approach to all things IT. With over two decades of experience implementing security solutions for SMB verticals, Sandbox Technologies' EGPSecure® professionals are experts at providing comprehensive security solutions to build organizational resilience and protect your most critical assets.

Whether it's analyzing existing protections, developing a cybersecurity plan, preparing for audits, or effectively implementing the latest security technologies, engaging EGPSecure® signifies an organization's commitment to placing security at the forefront of its Information Technology Strategy.

Security Strategy & Policy Development

Experienced EGPSecure® professionals can assist your organization with a host of professional advisory, security consulting and employee education services including:

- Information Security Reviews, Infrastructure Evaluations, Security Strategy Development, Compliance Assistance and Audit Preparation.
- Incident Response Planning.
- Development and Maintenance of Detailed Backup & Disaster Recovery (BDR) Plans.
- Creation and/or Assistance with the Development of Best-Practice IT Policies and Procedures.
- Information Security Awareness Training.

Expert Implementations

EGPSecure professionals bring decades of experience to the table, with advanced knowledge and experience implementing a myriad of security technologies and solutions including:

- Firewalls
- Mobile Device Management (MDM) Solutions
- NIST/DOD Hardening Standards and Encryption Solutions
- Data Loss Prevention Technologies
- Security Incident and Event Management (SIEM) Solutions
- Cloud-based DNS Security Services
- Spam and Malware Pre-Filtering Solutions
- Cloud Managed Antivirus and Security Suites
- Token, Mobile Device, Biometric and USB Key-Based Multifactor Authentication Solutions
- Single Sign On (SSO) Implementations

Your Commitment to Excellence

EGP Secure professionals set the standard for best-in-class security.

More than just advisors and more than just implementors, EGPSecure professionals are the premier choice when "Good Enough" is no longer enough for your organization.
