Professional Network Documentation

Proper documentation is key to effective IT management and plays a crucial role in maintaining the security of the network.

When issues occur, quick access to up-to-date information promotes rapid troubleshooting, reducing downtime and support costs.

Equipment Inventories

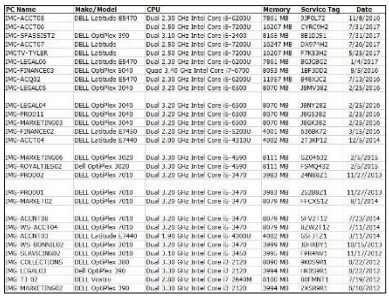

Accurately track IT assets and rapidly identify EOL (End of Life) equipment for budgeting and planning purposes.

Network Diagrams & Process Overviews

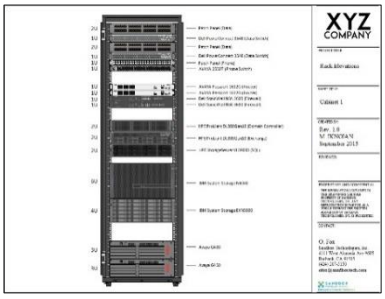

Streamline troubleshooting and the identification of security risks.

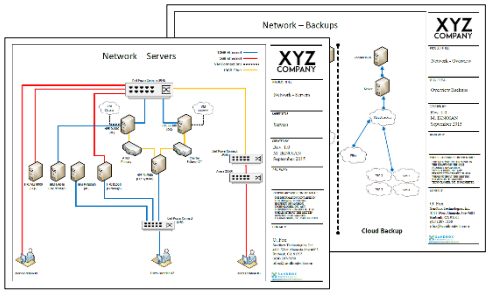

Rack / Equipment Elevations

Easily pinpoint the location of core networking devices. Equipment elevations are indispensable to remote support efforts, and aid in "walking" non-technical personnel through basic troubleshooting when emergencies occur.

PC Name	Make/Model	CPU	Memory	Service Tag	Date
DMC-ACCT08	DELL Latitude E5470	Dual 2.30 GHz Intel Core i5-6200U	7861 MB	3JPDL72	11/8/2016
