Cable Management for the Workspace

Give your office a clean look with workspace cable management. Make a strong impression while promoting a safer work environment.

Surface Wiremold & Cable Concealment

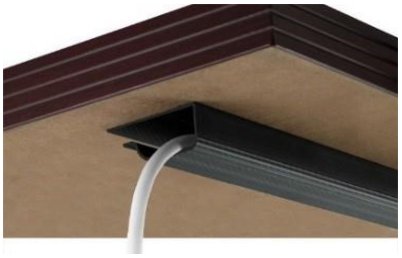

Conceal, route and protect low-voltage wires for a clean, safe workspace. Surface wiring solutions are an aesthetically pleasing way to make unsightly cables disappear and keep them out of harm's way.

Desk Aesthetic

Care and attention to detail are the core to transforming your office environment into a professional looking workspace. Cable management is crucial for maintaining an organized, functional and distraction-free environment.

Floor Runners

Create a smooth, trip-free surface that protects your wires from potential damage that may be caused by persistent foot or vehicle traffic. Floor runners have a smooth, rounded surface that helps when moving carts over wires and provides great cable protection.

Workspace cable management services are provided at a flat rate, based on assessment of the environment. Assessments are free of charge. Before commencement of work, you will be contacted to arrange after-hours access within a pre-defined schedule. (Workspace cable management services are typically conducted outside normal business hours to avoid disruption to your staff.)

For additional information, contact your Sandbox Technologies Engineer, Account Manager or Consulting CIO, or send an email to inquiries@sandboxtech.com.
